## Professional Summary

Product-oriented engineer with 3+ years at Cisco across backend development, enterprise SD-WAN operations, and customer-facing technical ownership, skilled in product discovery, user research, experimentation, and metrics definition. Proficient in SQL, Java, and A/B test design, with hands-on delivery of PRDs, KPI trees, and low-fidelity wireframes across four end-to-end product projects. Pairs technical fluency with direct customer empathy earned resolving live enterprise incidents and converting user pain points into shipped process improvements. Focused on data-driven product management for consumer and AI products, evidenced by a ChatGPT voice-input redesign grounded in n=47 user research.

## Skills

**Product & Discovery:** User Research, Problem Framing, PRD Writing, A/B Testing & Experimentation, KPI & Metrics Definition, Prioritization (Impact/Effort), Roadmapping, Competitive Analysis, User Personas & Journey Flows, Wireframing (Figma), Launch Planning

**Data & Analysis:** SQL, PL/SQL, Data-Driven Decision Making, Funnel & Retention Metrics

**Engineering:** Java, Python, FastAPI, Next.js, REST APIs, Multithreading, Git/GitHub

**AI & Applied ML:** RAG, LLM Integration (Llama 3.3, Gemini), Vector Search (ChromaDB), Model Context Protocol (MCP), Prompt Engineering, LLM Safety Guardrails

**Ways of Working & Deploy:** Agile, Scrum, Cross-functional Collaboration, Stakeholder Management, Vercel, Railway

## Experience

**Cisco Systems India, Bengaluru — Software Engineer** Jul 2024 – Present

- Delivered business-driven Oracle Agile PLM features in Java, turning stakeholder needs into shipped workflows.
- Optimized PL/SQL procedures behind Cisco's FAQMS backend, raising reliability of failure-analysis reporting.
- Owned operational workflows across production monitoring, job creation, and system reliability at release.
- Automated QA checks and ran sprint deliverables like TDD uploads, fixing production issues to guard quality.

**Cisco Systems India — Technical Consulting Engineer** Aug 2022 – Jul 2024

- Administered enterprise SD-WAN and Meraki deployments, ensuring reliable, customer-focused service delivery.
- Diagnosed complex network faults, cutting downtime and lifting customer experience via root-cause fixes.
- Championed user pain points as customer-facing contact, driving process improvements for system reliability.

**Cisco Systems India — Technical Undergraduate Intern** Jan 2022 – Jul 2022

- Engineered a full-stack Python tool with SSH, REST calls, and multithreading to automate end-of-life audits.

## Technical Projects

**ChatGPT Voice Input Redesign — Product Discovery, User Research & Experimentation** 2026

- Conducted n=47 user research surfacing black-box capture anxiety as the top barrier, cited by 36% of users.
- Designed a Live Transcription with Review flow that streams speech into an editable, pre-send draft field.
- Defined a North Star metric, KPI tree, and 50/50 A/B test targeting a 10-15% lift in voice completion rate.

**BURP — AI Recommendation Product, Concept to Deployment** 2025

- Built BURP, a Groq/Llama 3.3 70B recommendation product turning five preference signals into ranked results.
- Structured delivery across six phases from problem definition to deployment on Vercel and Railway hosting.
- Hardened reliability with 35+ automated tests, input-safety guardrails, and rate limiting on live traffic.

**Mutual Fund FAQ Assistant — Full-Stack RAG Product with Safety Guardrails** 2025

- Constructed a RAG chatbot over a 437-chunk ChromaDB index with Gemini embeddings and Llama 3.3 generation.
- Implemented multi-layer guardrails for PII detection, advisory refusal, and off-topic filtering with fallback.
- Shipped full-stack on FastAPI, Railway, and Next.js with an APScheduler cron re-scraping 60 fund URLs daily.

**Groww Review Pulse — MCP Customer-Insights Product** 2025

- Scoped a weekly review-pulse product converting up to 1,500 Groww reviews into one-page stakeholder summaries.
- Orchestrated an end-to-end flow from ingestion and theme analysis to report generation and MCP-based delivery.
- Validated the pipeline on live data with PII scrubbing, idempotency, and audit logging before production.

## Education

**B.Tech in Computer Engineering : [2018-2022] CGPA-8.47**

Thapar Institute of Engineering and Technology, Patiala
